

PRODUCT PERKS

Ditching the torch for an eNail comes with a bunch of benefits.

THERE'S NO OPEN FLAME.

The hassle of dealing with a torch can be daunting for some people.

IT'S A GREAT PRODUCT FOR OLDER PATIENTS AND THOSE WITH DISABILITIES.

If you don't have a steady hand or full mobility, an eNail is a great option .

IT TAKES THE GUESSWORK OUT OF TEMPERATURE.

There's no need to stress over heat-up and cool-down times when using an eNail.

QUICKER PROCESS.

Once your eNail is set up taking a dab is quick and easy!

MULTIPLE DABS CAN BE DONE WITH EASE.

You can medicate multiple times per session without having to reheat.

CHEMICAL-FREE.

There's no chance of butane or propane influencing the taste of your meds.

DABBING 202 ELECTRONIC NAILS

WHAT'S IN AN ENAIL KIT

Yo Dabba Dabba kits come with everything you need to ditch your torch and elevate your experience.

A HEATING COIL

The coil wraps around the nail and heats it with help from the control box. Make sure you have a coil that's compatible with your nail.

B CONTROL BOX

This unit allows you to set the coil temperature and monitor it through a digital display. If your box and coil are different brands, make sure they're compatible by confirming the PIN layout.

C NAIL

Available in many sizes and styles; nails that are compatible with eNails are designed with an arm or attachment to keep the coil in place.

D CARB CAP

Covers the top of your nail once the dab is dropped in. It helps trap and retain heat and controls and improves airflow.

HOW TO ASSEMBLE YOUR ENAIL

1. Connect the coil to the nail. (Follow product instruction guide if nail requires assembly.)
2. Place the nail into your rig.
3. Plug the coil into the control box.
4. Plug the power cord into the control box and into an outlet.
5. Turn the control box on and set your temperature.
6. Dab and enjoy!
