## SIZE

Joint sizes are measured in millimeters and generally come in 3 standard sizes. Our 19mm has a true size of 18.8mm.

## SEX

Once you have established whether your water pipe has a male or female joint, you will know which accessories will fit it.

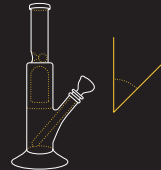

## NECK ANGLES

45° or 90° joint neck angles are to fit various water pipe joints to ensure that the nail is facing upwards.

Here are examples of the two types of neck angles:
